

Forest Fire Fighting

TIPS TO BE PREPARED IN CASE OF

FOREST FIRE RISK

MARCHE Interreg Italy-Croatia REGIONE MARCHE Fire Risk POWTOON

Do you know that 43% of the European territory is made up of forests?

POWTOON

Every year thousands of hectares of woodlands are burnt either by wilful or culpable fire

POWTOON

Knowing what to do and how to behave when you are in a situation of risk is essential to help and protect themselves and facilitate the work of rescuers

POWTOON

TO AVOID A FIRE...

POWTOON

Do not throw cigarette butts or matches that are still lit, as they can ignite dry grass.

POWTOON

Do not light fires in the woods. Use only equipped areas. Do not leave the fire and make sure it is completely extinguished before leaving.

POWTOON

If you have to park your car make sure that the muffler is not in contact with the dry grass. The hot muffler could easily ignite the grass.

POWTOON

Do not leave the waste in the woods or in illegal dumps. They are a dangerous fuel.

POWTOON

In a few minutes, you may not be able to control the fire.

POWTOON

WHEN THE FIRE IS IN PROGRESS...

POWTOON

If you see flames or even just smoke, call the European Emergency Number 112.

POWTOON

Find a safe escape route: a road or a waterway.

POWTOON

If you have no escape route, try to cross the fire where it is less intense to pass by the already burnt side and reach a safe place.

POWTOON

If you have no other choice, lie on the ground in a place where there is no burning vegetation. The smoke tends to rise, so avoid breathing it.

POWTOON

The fire is not a show, do not stop along the roads. It would interfere with the rescue and communications needed to manage the emergency.

POWTOON

Stay informed and follow the instruction of the authorities
